Dear Practitioners

This issue marks a milestone in two respects. First, with this issue we have reached the fourth anniversary of the publication of the Sai Vibrionics Newsletter. Our first issue was in September 2010. When it was ready to be presented, I printed a copy and brought it to darshan. As I was sitting in darshan, without my asking, Swami called me over and asked for the Newsletter. He looked through all of its four pages, one by one, and He blessed it, to my immense joy and gratitude. I know that the publication of our Newsletter continues to the present only through His Divine Grace.

The Newsletter originated to solve a problem. By 2010, Sai Vibrionics trainers had been mentoring practitioners for over 16 years. There were now some 4,000 practitioners working all over India and 80 other countries, and more practitioners were completing their training and beginning their Vibrionics seva every year. This created a problem for us, the core team of three or four, although it was a good one: The number of Vibrionics practitioners was multiplying every year. Consequently we were not able to stay in touch with everyone as we wished. We also had no means of getting out information to everyone on a regular basis. A Newsletter attached to an email seemed like a good solution, so we set out to create one.

We learned how as we went along. Initially we did not know what it would take to keep the Newsletter coming every two months, or whom Sai Baba would send to help us along the way. We also did not know how practitioners would view it, how they would use it, or what they wanted to see in it. Fortunately they told us. Many practitioners stepped forward to help by offering their time and talents. We are very grateful to all of our past and present contributors for making the Newsletter possible.

As you know, the Newsletter has been evolving recently. Our practitioner-centred content is expanding. The changes reflect the current mission of the Newsletter. Its mission is to help build the capacity of practitioners to offer the best possible Sai Vibrionics care for their patients; also to provide continuing education and helping practitioners develop a vital sense of community. We believe that when practitioners share their experience and knowledge, this seva encourages others to open their hearts, ask questions and start sharing. We feel this sharing of experience is essential if Vibrionics is going to progress. Swami tells us how important it is to develop a sense of unity to achieve social progress.

Our core team and other trainers will continue to teach everything we know. But you must also play your part in this process, and it is a significant one. Practitioners have much to teach and learn from each other.

Sai Ram Vibrational Healing will continue to advance mainly through the pooling of the practical knowledge and experience of practitioners. In other words, going forward the job of our Newsletter will be to serve as a vehicle for both teaching and collaboration.

This issue is a milestone in another respect. It is the last Newsletter that we will publish in pdf format. Up to now, we have been using the pdf format because of the limits of our email server in Prashanti. With the next issue, we plan to shift to an html web-based Newsletter to make its content more accessible to practitioners. Those of you who wish to print the Newsletter and read it, will be able to continue to do so with the new version. But those of you who prefer to access the contents of the Newsletter online will now be able to take advantage of an interactive format. You will be able to open the Newsletter on a desktop or laptop, on a tablet, or on a smart phone or other such device. You will be able to read the articles in any order. Also, the content of the current Newsletter and also previous Newsletters will be fully searchable. That means you will be able to use keyword and subject searches to pull up all relevant articles to assist you with patient treatment. For example, you will be able to search all case histories on the treatment of diabetes or compare the use of remedies prepared in water quickly and conveniently.

Originally we were planning to make the shift with this issue, but the process of conversion to html has been taking a lot longer than anticipated. We are doing our best but everything happens in Swami's time.

To conclude with a personal technical confession, I am sorry to report that some pending emails, sent to me by practitioners, were accidentally erased from my computer before I could answer them. I receive several dozen important emails a day, so I think many people may have been affected. My policy is to answer ALL emails. So if you have not received a reply from me, please resend your message. I apologize for the slip. Thank you for your understanding.

In loving service to Sai
Jit Aggarwal

Case Histories Using Combos

1. Mouth ulcers ^{02806...Malaysia}

On 23 March 2014, a 38-year-old male patient sought treatment for mouth ulcers of 15 years' duration. He had received treatment from a succession of doctors over the years: 2002-2004; also 2005, allopathic doctors (diagnosis of herpes simplex, treatment with the anti-viral Zovirax [Acyclovir] and the corticosteroid Prednisolone, with topical cream, for 3 months; temporary remissions and relapses, but ultimately, no improvement); 2006, Ear Nose and Throat Specialist (tonsillectomy and vitamins; no improvement); 2007-2010, traditional Chinese medicine (no improvement); and 2011-2014 additional doctors (no improvement).

An examination showed ulcers all over the tongue and on the mucosal surface of the mouth. The tongue was coated and

very sore. The patient was able to take only a liquid or semi-liquid diet and hardly any solid food because of the discomfort. Swallowing was very painful. He was quite worried and concerned. The patient was instructed to drink 200-250 ml of water daily upon getting up in the morning and to take the following combo for the next 2 weeks:

#1. CC11.5 Mouth infections + CC12.1 Adult tonic + CC15.1 Mental & Emotional tonic...5 pills dissolved in 90 ml of mineral water; 5 ml every 6 hours.

On 5 April, the patient was re-examined. A slight improvement of 5% was found. He still had multiple ulcers, but he reported fewer and less serious flare ups. He said he had been taking steroids to help the ulcers heal. The patient was told to continue taking the combo but to double the dosage to 5 ml every 3 hours for the next 2 weeks, and then return.

On 20 April, an examination showed 40% improvement in the number and seriousness of ulcers. The patient reported that recovery time was significantly shorter: ulcers that used to heal in 5-7 days now healed in 2 days. This was due to Vibrionics as the patient had stopped taking steroids for the previous 2 weeks.

On 10 May, the patient's remedy was changed to:

#2. Combo #1 + CC21.8 Herpes...5 pills dissolved in 90 ml mineral water; 5 ml every 3 hours (6TD).

On 22 May, a further examination showed 50-60% recovery. A few small ulcers were visible on the tongue, but the patient reported he could now eat solids like rice without any pain upon swallowing. The patient was told to continue with Vibrionics but the dosage was reduced to **TDS**.

As of 8 June, the tongue was more or less fully recovered, and overall the mouth ulcers were now 80-90% improved. The patient was able to resume his normal diet after 15 years. He was advised to continue the treatment and to see the practitioner if he experienced any relapse. As of July 2014, the patient was continuing with Vibrionics and had not experienced any relapse.

+++++

2. Urinary Tract Infection & Diabetes^{11520...India}

An elderly man (80) who was receiving Vibrionics treatment for diabetes (see below), sought treatment for symptoms of cystitis on July 17, 2014. He had a fever of 102° F (38.9° C), with pus cells in the urine of 80-100/hpf. For the week prior, he had frequent urination, pain and burning when passing urine, and urinary incontinence. He also had a history of chronic constipation (30 years) and diabetes (38 years).

For the acute symptoms, he was given:

#1. NM21 KBS + NM36 War + SM27 Infection + SR456 Bladder (Urinary) + SR536 Urethra + CC10.1 Emergencies...TDS

On July 22, after 5 days on the combo, the patient reported 50% improvement. He had no pain and burning when urinating; also his fever was gone so his temperature was normal.

On July 26, the patient reported 99% improvement. He no longer felt a frequent urgency to urinate, he could hold his urine and his pus cell count was down to normal, 3-4/hpf.

The patient had previously come to the practitioner in December 2012 for treatment of Type 2 diabetes. He had a family history of diabetes. His mother and all his brothers and sisters were diabetic. He had been diagnosed in 1982 and had started allopathic treatment at the age 42. He was taking Volibo M 0.3mg tabs BD and Ozomet PG 2 tablets TDS but still had elevated fasting blood sugar of 185-200mg/dL. He was given:

#2. CC6.3 Diabetes + CC10.1 Emergencies + CC12.1 Adult tonic + CC15.1 Mental & Emotional tonic...TDS

After 11 months and 2 weeks of vibro treatment, his fasting blood sugar had improved to 80-120mg/dL. His doctor had also reduced the Ozomet dosage to BD.

In March 2014, after the practitioner completed SVP training, the remedy was changed to:

#3. NM6 Calming + NM21 KBS + NM36 War + NM63 Back-up + BR2 Blood Sugar + SM5 Peace and Love Alignment + SM17 Diabetes...TDS

By the end of July 2014, the patient's doctor had reduced allopathic medicines to 50% of the initial dosage, and the patient was continuing Vibrionics. The patient remained very fond of eating sweets and goat meat. He was regularly eating one sweet per day but his fasting blood sugar was only 110mg/dL.

Patient's testimonial:

"I am 80 and have diabetes and got a severe urine infection. I have been taking Vibro treatment for the last year. My diabetes is under control after reducing allopathic medicines by half. Within ten days, my urine

Infection (80-100 pus cells) became normal (3-4 pus cells), and pain and burning while passing urine had gone. My general health has improved. Thanks for treating my problems effectively”.

+++++

3. Addiction to marijuana ^{02758...Russia}

A young couple, a 25-year-old man and a 24-year-old woman, were addicted quite strongly to smoking marijuana. They understood that it was bad for them and wanted to quit but had no willpower or capability to do so. Due to their young age, they had no acute or chronic symptoms yet, except for the addiction itself. When they started treatment at the beginning of July 2013, the man had been using marijuana for 4 years and the woman for 2 years. They took no other treatment apart from Vibrionics. They were given:

#1. CC15.3 Addictions + CC17.2 Cleansing...TDS

Quite remarkably, after the first day of treatment, the man could live without smoking several days. After the first month, the man reported a 50% improvement; the woman, 25%. By the time they finished the remedy in their bottle, they felt they were more or less free of the addiction. So they stopped treatment without consulting the practitioner. But the habit was still in control, so they had to resume treatment and take a second course in September 2013. They were given:

#2. CC15.2 Psychiatric disorders...TDS

This brought about a complete healing for the man – he hasn't smoked since and cannot even bear the smell of smoke any more — and 95% healing for the woman. She does occasionally succumb to smoking when stressed a lot, but never smokes marijuana any more.

Practitioner's comment:

“One more interesting thing about these people is that after some time without drugs, they started to attend ISKCON (International Society for Krishna Consciousness) With Bhagawan's grace, they have not just gained victory over drug addiction, but have even come to God and started to participate in seva projects themselves! Thank you Bhagawan for such miracles that inspire all of us so much!”

+++++

4. Stroke & intestinal infection in a dog ^{00829...Australia & South Africa}

One Monday morning in June 2014, the practitioner noticed that something was wrong with her dog Deedee. She was vomiting a little and could hardly walk. She was taken to the veterinarian. The vet said Deedee had suffered a stroke perhaps brought on by old age (she was 15). She also had inflammation of her digestive tract, which might have come from an infected bone, the former property of the neighbour's dog. Deedee was given cortisone (2 tablets BD) for 2 days for swelling in the brain and antibiotics (1 tablet BD) for 3 days for the infection. Vibrionics was also started immediately. On Monday (day 1) Deedee was given:

#1. CC3.5 Arteriosclerosis + CC18.4 Paralysis...every hour

On Tuesday (day 2) the dosage was changed to every 2 hours and an additional combo was given at the same time for the infection and inflammation:

#2. CC9.2 Infections acute...every 2 hours

On Wednesday (day 3), she continued with #1 and #2 at 6TD. Although the vet had said that the cortisone would stimulate Deedee's appetite, as of day 3, it had not. Deedee was still refusing to eat or drink anything. She would fall over whenever she tried to walk. She just lay where she was. That evening, the practitioner took her to another vet, who said she could be nauseous from uncontrolled fast eye movements. The practitioner then stopped cortisone and antibiotics and started Deedee on an additional remedy:

#3. CC4.10 Indigestion...6TD

Beginning on Thursday (day 4), Deedee started walking normally but with her head tilted. She ate a whole bowl of cat food and started drinking water again. The practitioner stopped #3 after Friday (day 5) but continued #1 & #2 at 6TD until the end of the week (day 7), TDS for the following week (days 8-14) and then OD for another week (days 17-22). Deedee continued to recover. About one month after the stroke, the practitioner reported that Deedee was barking, playing and running again as normal. She was the same dog as before. Only her head was still slightly tilted.

5. Poor vision (Macular hole) ^{02799...UK}

A 57-year-old male came to see the practitioner on August 14, 2013 because of poor vision. He had lost all vision in his right eye. The vision in his left eye was only 30% because of a hole in the central part of his retina (a lamellar macular hole). His ophthalmologist had said that if the hole did not close by itself, he would become blind. He had been receiving hospital treatment for the eye for the past year, but monitoring showed little improvement, about 10%. He was given:

CC7.1 Eye tonic + CC7.2 Partial Vision + CC7.4 Eye defects + CC7.5 Glaucoma + CC10.1 Emergencies + CC15.1 Mental & Emotional tonic...QDS for 2 weeks, then **TDS**.

On September 17, 2013 the patient saw a specialist and an OCT (optical coherence tomography) scan of the left eye was done. The specialist found that the macular hole was completely closed. The patient has since reported to the practitioner that his vision is much better than before. He is also feeling a sensation in his right eye now and tears are coming from the right eye, whereas before there was neither feeling nor tears. As of October 2013, he was continuing the treatment with the above combos **TDS**.

Patient's testimonial (email to the practitioner on September 30, 2013):

"As you can see from the last report which mentions the lamellar hole but the OCT Scan of today shows closed macular hole. This hole was not fully closed previously as mentioned in the report but was partially open. When I went for my OCT scan on September 17, 2013, this scan showed the hole fully closed. I came and saw you on 14th August and I had been taking the vibro pills combo you gave me since that date till the time of the OCT scan and still continuing. I believe the cure of this has occurred by the vibro pills provided by the practitioner.

I have complete faith in the treatment and am continuing with the pills as I believe my right eye vision will also come back. Many Thanks".

Practitioner's comment:

"I have had many cases like this, especially glaucoma cases, with patients with different problems but obtaining good results with Swami's Grace".

+++++
6. Insect Bites & Wounds ^{11176...India}

For 25 years, a 55-year-old man had suffered sores on his hands with pus and blood oozing out of them caused by insect bites. Twenty years back his mother had died after having been bitten by a snake, so in a rage, the man killed the snake. This history weighed on his mind; he felt it related to his problem with the difficult long-lasting sores. Allopathic medicines gave him no relief in this situation. He attended a medical camp in February 2013 and was given the following combo:

#1. CC21.4 Stings & Bites...TDS

After a month, he complained of arthritis. The combo was then changed to the following:

#2. CC20.3 Arthritis + CC20.4 Muscles & Supportive tissue + CC21.4 Stings & Bites...TDS

Within 4 months, his wounds started healing and a 25% improvement was noticed. After seven months, there was a 75% improvement, and a 95% improvement after eight months, after which he continued to take the vibro pills for 100% cure of bites and arthritis.

+++++
7. Ear Ache ^{00609...Italy}

One evening when this male practitioner (58) got into bed to sleep, his right ear suddenly began to ache. After 10 minutes the pain was unbearable. Not knowing what to do, he got out of bed to consult some of the books on homoeopathy. He noticed that the pain calmed down as he walked and got worse when he remained motionless. Then he thought of Rhus Tox, which is used to treat pain that improves with movement. He prepared for himself:

SR311 Rhus Tox (200C)

He took two pills and the pain was gone in 5 seconds.

Practitioner's comment:

"Sometimes the solution to a problem is found with intuition and with luck".

8. Herpes Zoster ^{00523...Belgium}

A female patient (63) suffers regularly from cold sores. She is given:
SR261 Nat Mur...TDS

This remedy gives immediate relief and speeds up the drying out and healing of the sore. Whenever itching symptoms are triggered, immediate use of the Nat Mur tissue salt prevents the sore from breaking out

☞ Tips from Practitioners to Share ☞

Living with Electronics

Using foil as a shield against cell phone radiation ^{01644...USA}

I use aluminium foil on my 108 Common Combo kit and also when I give out remedies because most people have cell phones with them. I noticed that after using the foil for a while, if you hold it up to the light, it has tiny holes in it. When I put my cell phone in the piece of foil with holes, it rang when called, but in the new foil, it did not. I will try buying heavy duty foil to see if it lasts longer.

Student sleep hygiene ^{11483...India}

School and college kids often complain of headache and insomnia. Along with the remedy, they should be advised to keep their mobiles and laptops away from themselves while sleeping.

☞ Practitioner Profiles ☞

Practitioner Profiles and Experiences from Gurgaon, Haryana, India ^{11483...India}

Practitioner ^{11483...India}

I live in Gurgaon. I have a Bachelor of Science degree. Since June 2011, I have been a Vibrionics practitioner. I became an SVP in December 2012. To date, I have treated more than 2,500 patients. I have successfully treated cases of Diplopia (double vision), fractures, gangrene, benign tumours, asthma, leucoderma, heel spur, infertility, leucorrhoea, gall stones, sinus infections, migraine, skin diseases such as eczema, and have got good results when using anti-chemotherapy with cancer patients.

Since the time I have been doing this seva, I have become a lot more compassionate, humble and patient in my day to day life. I feel like I have become better as an individual. I have realized that the more I give, the more I get in return. I have seen a kind of love and respect in the eyes of my patients that moves me. I get a divine feeling while doing seva and this has brought me closer to Swami.

Every fortnight in Gurgaon we have medical camps which include Vibrionics practitioners as well as allopathic doctors. From there chronic patients are taken to hospitals for further checkups, and in accordance with the findings, a course of treatment is given to the patients along with vibro remedies.

I would like to share two of my cases involving young patients in our medical camps:

#1. A 5-year-old boy met with an accident while crossing the road. He suffered severe skull injuries and got quite a few stitches. After 10 days of treatment the doctor noticed that his left arm was immobile, so he advised an MRI. I gave the boy:

CC10.1 Emergencies + CC12.2 Child tonic + CC18.5 Neuralgia...TDS

The next day when the doctor came to check his patient, he found that his arm was 50% better than the day before and said that an MRI would not be needed. The patient was discharged. Two days later when I contacted the boy's father to explain about physiotherapy exercises that the boy would have to do to cure his arm, the father said that physiotherapy would not be necessary as the boy's arm was perfectly fine and 100% cured.

#2. A 15-year-old boy had been suffering from psoriasis for the past 2 years when he came to the medical camp. Despite taking various treatments, both allopathic and homoeopathic, the condition had not improved. I gave him the following remedy, to be taken orally as well as applied externally in water:

CC21.2 Skin infection + CC21.10 Psoriasis...TDS

After 15 days, I examined him again at the next medical camp. There was 60% improvement in psoriasis and the boy was very happy. The above remedy was repeated for another 2 weeks and the condition had now improved by 90%. The boy decided to continue with Vibrionics.

Personal Anecdote

I would like to add one more personal experience. I have been treating quite a few TB patients. Every time I have taken them for checkups, doctors have been quite amazed that none of them has complained about nausea, vomiting and burning. Their LFT (liver function test) reports have always been normal. The latest patient was a lady, 45 years of age. One of her lungs was completely infected by the disease, except for a small portion which was normal. After 2-3 days of taking an allopathic treatment, she complained of severe nausea, vomiting and burning. Her Vibrionics treatment was then started and she got relief from the side-effects. After a month I took her to the doctor for a check-up, her X-ray was repeated and the results were amazing. The X-ray showed only a small portion of the lung was infected. The rest was clear. He asked the patient if she was having any problems with the medicine, at which she looked at me and replied, "Yes, Madam gave me some pills. After that I have had no problems".

Introducing the Gurgaon Group

I would now like to introduce other practitioners who serve in our Gurgaon Vibrionics group and invite them to share their experiences.

Practitioner^{11482...India} I am a housewife. I received my AVP training in the Sai Centre in New Delhi in 2011. Since then, I have been practicing Vibrionics to heal patients.

One of my patients was a girl of 17 who complained about corns and fungal infection on her feet. She had suffered from this problem for 3 years. I gave her the following combo to take for a week and advised her to keep her feet clean:

CC21.1 Skin tonic + CC21.5 Dry Sores...TDS

By the end of the week, her feet had improved by 75%. She continued taking the remedy for 6 weeks, after which she was completely cured.

Practitioner^{11966...India} I have been practicing Vibrionics since April 2014. I am an IT engineer working in a software company in the Delhi area. I came to know about Vibrionics as a patient in one of the medical camps organised in Gurgaon. I was suffering from depression at that time. I took the treatment from one of the practitioners and was cured. Then I took the course and started my seva. I am one of a group of three vibro practitioners working together. On alternate Sundays, a medical camp is offered in different locations in Gurgaon. We go there and by Swami's Grace give Vibrionics to patients.

At the start, I was feeling nervous about choosing the right combo for the ailments. But with proper guidance from our senior **practitioners^{11483 & 02859}**, it was made easy. Every time I give Vibrionics to someone, I feel I have moved a step closer to Swami. It is a wonderful feeling to do this seva.

To give one example from my practice, I treated a case of chronic constipation in a boy who was two years old. He had been suffering from constipation since he was one. He had been given allopathic medicines but the problem kept on recurring. I gave him:

CC4.1 Digestion tonic + CC4.2 Liver & Gallbladder tonic + CC4.4 Constipation + CC4.10 Indigestion...TDS

This combo was prepared in 200ml of water and given in doses of 5ml. Within 3 days his constipation was gone. He continued this combo for 2 more weeks. After that, the dosage was reduced to **OD** for maintenance.

Practitioner^{11968...India}

I did my AMIE and worked as a librarian in Chinmaya Vidyalaya for 9 years. After moving from Hyderabad last year, I was very blessed to connect with the Sai family here and participate in the medical camp. This was a great miracle in my case, as I have been serving in the Sri Sathya Sai Seva Organisation in Hyderabad for the last 20 years, and coming to Gurgaon had been a great change in terms of activities left behind.

During the camp, I saw this senior **practitioner^{11483...India}** helping and guiding the patients with Vibrionics along with our allopathic doctors. Initially I was puzzled and mesmerised. I was astonished to see what a divine blessing this was, for all to get cured. I had the yearning to help and be a source of joy. I am grateful to this practitioner because she guided me to the Delhi-NCR coordinator to enable me to

pursue the Vibrionics course online. Under the able guidance and support of other practitioners, I have been doing seva since April 2014.

I am very happy to share two remarkable experiences:

#1. The first experience was a treatment for addiction. One of our patients was a man of 36 who wanted to end his addiction to chewing tobacco and betel leaf (paan), which he had since he was a teenager. As this was a long-standing habit, I first counselled him and advised him of the consequences. I then gave him: **CC15.1 Mental and Emotional tonic + CC15.3 Addictions...TDS**

The patient had been initially asked to take the remedy for 15 days, but by the second day of treatment, the patient lost his urge for tobacco and betel leaf and stopped taking them both entirely. He was asked to continue the combo for another week. Then his dosage was reduced to **OD** for one week more, and he was 100% cured.

#2. The second experience happens to be a personal one. Once when I had delayed and continuous menstrual bleeding for 22 days, I treated myself with:

CC8.1 Female tonic + CC8.6 Menopause + CC8.8 Menses irregular + CC12.1 Adult tonic...TDS

After taking the remedy for two days, I got a slight improvement. But the remedy had a truly remarkable effect the third day, when I took frequent doses of the same remedy in water by dissolving the same pills. The bleeding stopped completely. I continued to take the remedy in water for another day, and then took the pills **TDS** for another 2 days as a precaution.

Practitioner^{11380...India}

I would like to share my experience with growing vegetables using vibrionics.

Bottle gourd (Loki): We have a paved back yard wherein a space around 18' X 15' is left for vegetable farming. I decided to grow loki there. I made a plant tonic with an anti-fungus combo:

CC1.2 Plant tonic + CC21.7 Fungus, 5 pills in a bucket of water

I watered all the plants once every two weeks with this. I also talked to them,

touched their soft leaves, chanted "Sairam" and lovingly told them to yield their best fruits.

The bottle gourd creepers grew up quickly and started bearing fruits. From seeds sown in mid-April 2014, the plants started giving gourds by the end May 2014. Bunches of loki grew long and tender.

My delighted neighbours who lived above us and also next door, watched the loki regularly and started asking, what was the secret that made them grow so fast and long? Some of the gourds were 62 cm to 70 cm long and very tender as shown in the pictures (above and on the next page). When I pierced one gently with my fingernail, it went right through the outer skin and juice started flowing out!

I distributed the ripe gourds to all my neighbours and friends.

They mentioned later that the dishes made with them were very tasty and the vegetable was soft and tender.

I told them about the plant tonic and Vibrionics. After this, some ladies got the combo from me. They have started using it in their own vegetable gardens.

Radish, Turnips & Spinach (Palak)

I also used Vibrionics to grow radish, turnips and spinach in my backyard garden. Once again, I prepared the same Vibrionics combo:

CC1.2 Plant tonic + CC21.7 Fungus, 5 pills in a bucket of water

I watered them with this combo once a month chanting the divine name "Sairam". I also stored some of this mixture in a spray bottle, which I used on the plants once in a week.

In addition, I always talked to the plants.

As shown in the pictures below, the spinach leaves grew broad and very green (below, left).

The turnips were plump and grew in bunches (centre). The radishes grew tender and long. Many of them were as long as 42 cm (right). The raw radish tasted as good as tender coconut. All who tasted it liked it.

The vegetables were distributed and everyone enjoyed the taste of dishes made from the organic vibro veggies.

☪ The Answer Corner ☪

1. Question: If I am not able to find ethyl alcohol in my area, can I use methylated spirit which is easily available?

Answer: No because methyl alcohol is poisonous if taken internally; it is the same as rubbing alcohol. Ideally, we should use ethyl alcohol of 96% purity. If this is not available, one can use clear liquor like gin or vodka as a temporary measure.

+++++

2. Question: If by using the machine, I find a good remedy for a symptom, can I add this to the appropriate combo in my 108CC box?

Answer: The 108CC box is being continually updated by our research team. Hence your feedback of such successful remedies is vital to the ongoing development of vibrionics. However, this remedy can be

added to the combo prepared for the individual patient. I suggest that you don't add this to your CC box because our research team takes into consideration many other aspects of a remedy before adding it to a common combo. We recommend that all practitioners should recharge their box at least once in two years. Contact your local coordinator for this or if visiting the ashram, send us an email in advance to make arrangements.

+++++

3. Question: If a patient requests that his homoeopathic remedy be potentised, either because he has more faith in vibrionics or for economic reasons, what potency is to be used - 200C?

Answer: If you need to potentise a homoeo remedy, it should be done at the original potency of the remedy. However, if the patient really has more faith in vibrionics, it would be better to give a full consultation to the patient and prepare a remedy accordingly.

+++++

4. Question: I note that in case histories, practitioners mention percentage improvement in the symptoms. How do they arrive at these figures?

Answer: These figures come from the patient and may not be accurate but they act as a good guide and serve our purpose. Often it is not easy and it may only be after some dialogue with the patient that one manages to extract this information from him.

+++++

5. Question: Some patients have reported a drop in blood sugar level after taking their night time dose of CC6.3 Diabetes while on TDS dosage. Please advise how to proceed with a diabetic patient.

Answer: It depends on whether the patient is also taking allopathic medicine. As most diabetic patients are on some form of diabetes medicine, proceed with caution. Start by prescribing **OD** and gradually build up to **TDS**.

+++++

6. Question: Should a practitioner continue to treat patient who has been told by his doctor that he is clear of cancer?

Answer: Yes, because with all vibro remedies, the treatment should be gradually tapered off; so give the following:

CC2.1 Cancers – all + CC2.3 Tumours & Growths (if applicable) + combo for specific body part...OD for 4 weeks then **OW** for 4 weeks. After this, give **ONLY *CC2.1 Cancers – all...one dose monthly** for 6 months, then **one dose every 3 months** for a year. Finally **a yearly dose** for 7 years.

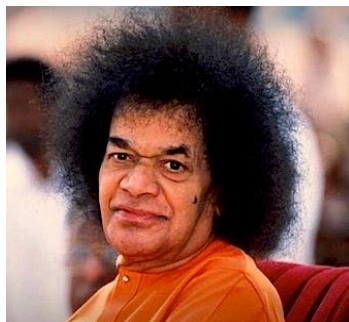

***CC2.1 Cancers – all** should also be used as a prophylactic for people with parents or grandparents who have had cancer and new patients who have recovered from cancer...**OW** for 4 weeks, **one dose monthly** for 6 months, then **one dose every 3 months** for a year. Finally **a yearly dose** for 7 years.

Note: A patient should not take any other vibrational medicine three days before and three days after taking any of the above combo.

*If using SRHVP machine, replace **CC2.1 Cancers – all** with this combo: **BR4 Fear + SM1 Removal of Entities + SM2 Divine Protection + SR282 Carcinosis CM.**

+++++

Practitioners: Do you have a question for Dr Aggarwal? Send it to him at news@vibrionics.org

☪ Divine Words from the MASTER Healer ☪

“The body is a temporary habitation, subject to all kinds of diseases and injury. Yet the same body is also the boat, which alone can carry us across the ocean of life or Samsara. The boat has to be kept trim and serviceable. It should not distract our attention more than the minimum necessary for its upkeep. It has to be used for reducing the burdens of others and should not itself become a burden on us. It should serve others and not demand service from them”.

...Sathya Sai Baba, Love All, Serve All, Help Ever, Hurt Never, book commemorating Sathya Sai Baba's 80th Birthday, 2005

“Earn a good name in Society. Let Seva be your motto. Service is most important. It helps to promote humility and to further the Oneness of mankind. Promotion of that Oneness should become your life's goal”.

...Sathya Sai Baba, Love All, Serve All, Help Ever, Hurt Never, book commemorating Sathya Sai Baba's 80th Birthday, 2005

☪ Announcements ☪

Forthcoming Workshops

- ❖ **India Kasargod, Kerala:** AVP Training 27-28 September 2014, contact Rajesh Raman by email at trainer1.ker@vibrionics.org
- ❖ **UK London:** All practitioners meet 14 September and AVP Training 27-28 September 2014, contact Jeram by email at jeramjoe@gmail.com

All Trainers: If you have a workshop scheduled, send details to: 99sairam@vibrionics.org

☪ Special update from the Editor ☪

In July 2014, *Souljourns* released Ted Henry's two-part interview with Dr and Mrs Aggarwal, conducted in January 2013. Many thousands have watched the interview on <http://vimeo.com/souljourns> and hundreds of inquiries have already been received by the Vibro team from individuals seeking referrals to practitioners in their area or wanting to become practitioners themselves. If you have not watched the videos, we think you will enjoy watching them and sharing them with your patients. You will find them on the Sai Vibrionics YouTube Channel under these links:

- ❖ Part 1: www.youtube.com/watch?v=Pkc88avcYNQ The Aggarwals' personal experiences with Sathya Sai Baba.
- ❖ Part 2: www.youtube.com/watch?v=fNzC6XxLH50 More experiences of the Aggarwals including Vibrionics.

Also, our video *What is Vibrionics?* has been viewed over 4,000 times so far. You and your patients can see it by going to www.vibrionics.org and using the link at the bottom of the homepage.

Important: Attention All Practitioners

- ❖ Many of the cases we receive are excellent but we are not always able to share them because some essential information is missing, which only the practitioner can supply. So PLEASE when you send in your cases do make sure to include the following:

Age of the patient, male/female, date treatment started, detailed list of all acute symptoms, detailed list of all chronic symptoms, duration of each symptom, possible cause of each chronic symptom, any other past/existing treatment, combo given and its dosage and duration, date-wise record of percentage improvement, final condition, and any other relevant information.

This will help us include your cases in future Newsletters.

- ❖ Our website is www.vibrionics.org. You will need your Registration number to login to the Practitioner Portal. If your email address changes, please inform us at news@vibrionics.org as soon as possible.
- ❖ You may share this Newsletter with your patients. Their questions should be directed to you for answers or for research and response.

Jai Sai Ram!
