Dear Practitioners

It gives me immense pleasure in communicating to you that there has been a phenomenal heart-warming response to our call for help in the March/April newsletter. More vibrionics practitioners especially from India, UK and USA have come forward to volunteer their services for mission-critical administrative activities. I take this opportunity to express my heartfelt gratitude to all the new and experienced admin volunteers.

As our community of practitioners continues to grow from strength-to-strength, and with the ever increasing global awareness of vibrionics, we anticipate that we will need more and more practitioners to take on administrative roles. I am making a request to any practitioner who is interested in finding out more about available specific tasks to kindly reach out to 99sairam@vibrionics.org.

With a view to leveraging the power of collaboration, we have initiated two new programs that will be rolled out globally. These are as follows:

- To provide the much required motivation and encouragement to all practitioners, we are initiating weekly/monthly meetings/get-togethers, both in person and/or virtually (e.g. videoconference via Skype). In India, UK, and USA, groups of practitioners have already scheduled meetings to be held on a weekly or monthly basis to discuss their cases and questions with other practitioners. These local teams will provide support to their members in problem-solving as needed and conduct research. I believe this will be very useful, especially for the newly trained practitioners, who need a lot of hand-holding and access to experts/SVPs.
- The second new program, the Vibrionics Broadcast Network is being launched by our Coordinator⁰¹³³⁹ for USA and Canada. Volunteer practitioners with SRHVP will collaborate with AVPs and VPs in broadcasting healing vibrations remotely to patients who are unable to take vibrionics remedies due to circumstances such as being hospitalised, severely disabled or in an unconscious state, or living in remote locations.

Work has begun on developing guidelines for conducting collaborative meetings, and on the framework for procedure and tracking outcomes related to the broadcasting network. We are confident that a lot of interesting and highly beneficial insights will emerge from these initiatives.

These are exciting times for Vibrionics and I am truly humbled to be reporting the developments as they take place. I look forward to reporting progress on the above initiatives in a future Newsletter with the intent to replicate them in other countries.

It is my sincere prayer to our Loving God to be our eternal charioteer.

Sending all of you light and love,

In loving service to Sai

Jit K Aggarwal

☞ Case Histories Using Combos ☞

1. Laukaemia^{10728...India}

A 21-year-old medical student suffered from acidity, sleeplessness, extreme weakness and weight loss but the cause was not known. When she was taken to the hospital, blood tests revealed that she had Leukaemia and it was stage four cancer. Her haemoglobin and platelet counts were very low. Doctors gave a bleak prognosis, not expecting her to survive. Even her brother studying in London was called as they thought her end was near. She was unable to even get out of bed, so stayed in the hospital and patient's father decided to contact the vibro practitioner. On 13 November 2014, she was given:

For leukaemia:

#1. CC2.1 Cancers - all + CC2.2 Cancer pain + CC2.3 Tumours & Growths + CC3.1 Heart tonic + CC3.2 Bleeding disorders + CC10.1 Emergencies + CC15.1 Mental & Emotional tonic...QDS

For acidity and weakness:

#2. CC4.10 Indigestion + CC12.1 Adult tonic + CC15.1 Mental & Emotional tonic...QDS

For sleeplessness:

#3. CC15.6 Sleep disorders + CC18.1 Brain disabilities...half an hour before going to bed, and again just before going to bed.

On 30 November, patient's father told the practitioner that she had developed anal fistula, so the following combo was given:

For anal fistula:

#4. CC4.4 Constipation + CC13.3 Incontinence...QDS

The fistula healed completely within a month after which **#4** was tapered off and then **stopped**. With the onset of cold weather in December, the patient developed breathing problem and also she also had no appetite. On 9 December she was given two additional remedies:

For breathing difficulty:

#5. CC9.2 Infections acute + CC19.2 Respiratory allergies + CC19.3 Chest infections chronic + CC19.6 Cough chronic...QDS

For loss of appetite:

#6. CC4.2 Liver & Gallbladder tonic + CC4.6 Diarrhoea + CC4.10 Indigestion + CC12.1 Adult tonic + CC15.1 Mental & Emotional tonic...QDS

Within a month, her breathing problem had resolved and her appetite too had improved, both **#5** and **#6** were tapered off and then **stopped**.

In January 2015 patient was shifted to a cancer hospital. She then underwent chemotherapy and bone marrow transplant. The patient was much weakened and lost her hair during treatment. She continued to take **#1**, **#2** and **#3** throughout this time and made a quick recovery. Her hair started to grow back. She was discharged from the hospital and came back to her home town in April. Screening tests on 4 April revealed that her platelet count and haemoglobin level had improved. As she had regained her normal sleep pattern, **#3** was stopped. She took her college exams which she had missed earlier. In August, she started attending classes at her college and resumed her medical studies. Screening tests done on 17 September revealed no traces of cancer cells. All blood cell counts including haemoglobin level were back to normal. So the dosage of **#1** and **#2** was reduced to BD. The grateful parents and the patient started attending regular bhajans at the Sai Centre.

On 30 December, patient came to Puttaparthi along with her parents to attend New Year celebrations. She did seva for ten days in Puttaparthi. In January 2016, the dosage of **#1** and **#2** was reduced to 3TW. She has a screening blood test done every month, all reports so far have been normal. In April 2016, her hair has grown back and she has completely regained her good health. Vibro treatment was stopped and she leads a normal life now.

2. Menorrhagia, uterine fibroids ^{10728...India}

A 48-year-old lady who was suffering from severe menorrhagia for the past six months contacted the practitioner in June 2013. She had heavy non-stop bleeding with clots throughout the month of June. She also experienced some pain. Investigations revealed that she had fibroids in her uterus, and she was advised by her doctor to undergo hysterectomy. However, she chose not to have surgery but opted for vibrionics treatment. As she was unable to travel, the husband came on her behalf for the first appointment. The practitioner gave the following remedies:

#1. CC10.1 Emergencies. The husband was instructed to put a single dose in his wife's mouth as soon as he returned home.

#2. CC8.4 Ovaries & Uterus + CC8.6 Menopause...QDS

#3. CC20.6 Osteoporosis...QDS

The practitioner prescribed **#3** because osteoporosis is directly linked to menopause.

After two months of this treatment, her periods stopped. Fresh scans revealed there were no fibroids. The doctor told her that there was no need to have hysterectomy. The lady felt fit and well, and resumed her seva work with enthusiasm and leads a full, normal life now.

3. Infertility ^{10728...India}

A childless couple who had been married for eight years contacted the practitioner for treatment of infertility on 14 March 2014. The woman was 34 years old and had no health problems. She had conceived soon after getting married but sadly had a miscarriage, after which she failed to conceive. She was very stressed as her husband's family felt the problem was with her. Medical consultation revealed that all was well with her, however her 45-year-old husband had a very low sperm count. He also suffered from diabetes which was well controlled with allopathic medication. They were treated with the following combos:

For the wife:

#1. CC8.4 Ovaries & Uterus + CC12.1 Adult tonic + CC15.1 Mental & Emotional tonic...QDS

For the husband:

#2. CC12.1 Adult tonic + CC14.3 Male infertility + CC15.1 Mental & Emotional tonic...QDS

On 15 January 2015 tests revealed that the wife was 46 days pregnant. The happy couple was instructed to stop **#1** and **#2**. The wife was then given the following combo:

For pregnancy and morning sickness:

#3. CC8.2 Pregnancy tonic + CC8.9 Morning sickness + CC15.1 Mental & Emotional tonic...QDS

The pregnancy was smooth without any problems. On 27 August 2015, much to the delight of the happy couple, a healthy baby girl was born by normal delivery. **#3** was now stopped. Both mother and baby are doing well. The couple is very grateful for this wonderful blessing brought through Sai Vibrionics.

4. Head lice infestation ^{11573...India}

Two sisters aged 13 & 9, who were suffering from infestation of head lice for the past 6 months, contacted the practitioner on 5 June 2015. They had tried various remedies including medicated shampoos, but unfortunately none of the anti-lice treatments had proven effective. They were given the following combo:
CC11.2 Hair problems + CC12.2 Child tonic...TDS

Considerable improvement was observed within the first fortnight. By the end of the third week, both sisters were completely cured of the head lice infestation. They continued with the treatment for another week. Both girls have happily continued to be free of the head lice as of April 2016.

5. Diabetic rash ^{03516...Canada}

A 66-year-old man, suffering from diabetic rash on his back and sides for over three years, consulted the practitioner on 15 January 2015. At many places, the rash was reddish, tender and filled with pus. The allopathic doctors had previously prescribed various creams and antibiotic lotions. The rashes would heal for a few weeks only to appear again on another part of his body. The patient was in much discomfort due

to itching and pain. He learnt of Vibrionics from the practitioner and immediately decided to take the remedies since this healing system had been blessed by Swami. The patient was not taking any other medication orally or any topical application for his skin at this time. Diabetes was controlled by a low dose of Metformin.

He was given the following combo:

CC12.1 Adult tonic + CC14.1 Male tonic + CC21.3 Skin allergies + CC21.6 Eczema...TDS

In addition to taking the remedy orally, the patient was instructed to dissolve five pearls in 200ml of extra virgin olive oil for daily application to the affected area.

One week later there was some relief from the itching. After one month, the itching had reduced by 90% and the area covered by rash by about 30%. After two months the itching was completely gone, and the rash reduced by about 50%. After three months the rash had mostly dried up and was about 90% better. Throughout the course of the treatment, as the rash slowly disappeared, the pain also diminished proportionately. At the end of four months in May 2015, the rash was completely gone and the oral dosage was reduced to **OD**. He subsequently stopped the topical application of the remedy. As of March 2016, the rash never reappeared but the patient continues to take the remedy **OD**.

+++++
6. Fracture of Ankle ^{11520...India}

A 53-year-old man, husband of the practitioner, had a fall on 28 September 2015 and suffered from a fracture and ligament damage at three points of the left ankle. The pain was excruciating and the foot swelled up (see pic) to an extent where the patient could not even wear his slippers.

For the last five years the patient had already been suffering from poor mobility due to fusion of ball of femur at hip joint caused by poor circulation of unknown cause. With the help of vibrionics treatment he was able to walk independently on flat floors and do his daily routine work. After the ankle fracture, however, due to the severe pain he found it very difficult to carry on his daily routine. Pain was more intense during evening and night times. He was advised by the doctors to have his leg in a plaster cast for eight weeks but the patient refused. He believed the resulting reduction in mobility would worsen his hip joint fusion. The doctor advised him to take painkillers and calcium along with a local application of an ointment and cold fomentation. Patient did not take any painkillers nor did he use any ointment. He used cold fomentation for a couple of days but had to stop it because of the cold weather. He was on bed rest and was treated with the following combo:

NM7 CB7 + NM67 Calcium + SM28 Injury + SR280 Calc Carb + SR295 Hypericum + SR311 Rhus Tax + SR353 Ledum + SR398 Nat Carb + SR550 Gnaphalium + SR574 Tendonitis + SR503 Ligament + CC10.1 Emergencies...6TD

Within eight days there was 45% improvement in pain and swelling in the foot. He was able to do his daily routine work with some help. Dosage was now **reduced to QDS**.

After fifteen days swelling had completely subsided and there was 65% improvement in pain. The foot looked normal and the patient could carry on with all his normal routine work himself. Dosage was **reduced to TDS**.

After twenty four days on 22 October, there was 100% improvement. The foot was normal (see pic) with no trace of pain or swelling. The dosage was reduced to BD for a week, followed by OD for another week and then OW. The treatment was discontinued on 14 November 2015. However, he continues to take vibro for his hip joint fusion.

Editor's note: SR280 Calc Carb is for swollen soft bone; SR295 Hypericum for injury to nerves; SR311 Rhus Tax for pain in ligaments; SR353 Ledum for swollen ankle; SR398 Nat carb for weak ankle; SR550 Gnaphalium for ankle joint and SR574 Tendonitis for painful inflammation.

+++++

7. Bell's Palsy ^{03529...UAE}

On 20 September 2015, the practitioner happened to run into her 34-year-old male colleague. She noticed that his face looked different. He explained to her that he had been absent from work for the past two weeks because he was suffering from Bell's palsy caused by a viral infection. He had rushed to the hospital after noticing a significant facial distortion and his doctor prescribed him corticosteroids for one week. The medication did not improve his condition much. He had pain and discomfort around the jaw, blinking eyes, impaired speech and difficulty in eating or drinking. So the doctor advised him to rest for one week and then start physiotherapy. He was not on any medication when the practitioner met him. When she suggested that vibrionics could help him, he readily agreed and started taking the following remedy the very next day.

CC9.2 Infections acute + CC10.1 Emergencies + CC12.1 Adult tonic + CC15.1 Mental & Emotional tonic + CC17.3 Brain & Memory tonic + CC18.1 Brain disabilities + CC18.4 Paralysis...6TD

After seven days, the patient stated that he felt an overall improvement of 50%. There was 70% improvement in his speech, over 50% improvement with respect to blinking eyes as well as the ease with which he consumed food and drink. Jaw pain improved by 50%, and it was painful only when touched. The patient revealed he was taking the remedy QDS even though 6TD was prescribed.

In another three weeks' time, an improvement of 80 to 90% was achieved in all the symptoms. The patient having experienced such a quick recovery, decided not go for physiotherapy nor did he go to see his doctor. He continued taking the vibrionics remedy.

In another two weeks by 2 November, he had made 100% recovery. He could comfortably speak and eat, his eyes were normal, and jaw was free of pain. The dosage was then reduced to OD and the patient continued the treatment till the end of November 2015. As of March 2016, he is in good health.

8. Chronic pain in knee joints ^{02899...UK}

A 58-year-old man suffering from painful knee joints was seen on 2 May 2014. About eleven years ago, the patient suffered from pain in the lower back, which had cleared following a Reiki treatment. For the last three years he had been getting acute pain in both the knees after walking even short distances and thought that this may be the early stage of arthritis. He had a benign lump removed from the right knee a few years ago that could have possibly contributed to the knee joint pain. His medical general practitioner had advised him to take over-the-counter medications such as paracetamol or ibuprofen, which he took when in pain for temporary relief.

On 9 May 2014, he was given:

CC12.1 Adult tonic + CC15.1 Mental & Emotional tonic + CC20.2 SMJ pain + CC20.3 Arthritis...TDS

The patient who had already been made aware of the possibility of a pullout reported after ten days that on starting the treatment he did experience a pullout that manifested as mild diarrhoea the first two days of the treatment. His pain in the knees after walking short distances was 25% less and he was feeling more energetic. A month later the patient reported that his knee pain had improved significantly by 75% and he was not getting any pain after walking longer distances. After further four months he was 100% healed of the pain. The patient continued the remedy at TDS for two more months and was put on a dosage reduction plan starting January 2015. He took the remedy BD for 2 months, followed by OD for two months and then OW for 6 months. During this time the patient remained free of any pain in the knee joints and the treatment was discontinued in October 2015. He did not take any allopathic medicines for this condition since he started Vibrionics.

In January 2016, the patient was put back on an **OD** dosage as he reported having experienced some pain after undertaking a very strenuous activity, extreme cold weather conditions contributing to it as well. The pain went away as he took the remedy. He is happy with the treatment and feels 100% better as of March 2016.

9. Lichen Planus ^{03507...UK}

A 62 year-old-man had been suffering from a distressing skin condition for over 20 years. When he visited the practitioner on 15 November 2015, he said he was suffering from psoriasis. His hands and legs were covered with scars from old lesions as well as fresh lesions. There were lesions on his forehead near the hair line. His scalp was also affected resulting in copious production of white skin flakes which were

apparent in his hair and also dropping on to his shoulders. The lesions were itchy. He had tried allopathic, ayurvedic and homeopathic treatments but none of them had worked. He was given the following combos:

For psoriasis:

#1. CC21.1 Skin tonic + CC21.2 Skin infections + CC21.3 Skin allergies + CC21.6 Eczema + CC21.10 Psoriasis, two drops of each CC in one litre bottle of extra virgin olive oil... **TDS**, to be applied on skin lesions

#2. CC12.1 Adult tonic + CC15.1 Mental & Emotional tonic + #1...QDS

After a week some active lesions were fading, but the itching sensation had increased, especially at night and it was disturbing his sleep. Patient was asked to apply the olive oil only in the mornings and omit the night-time application. After three weeks the severe itching persisted. Also after a session of gardening, patient had developed reddish patches of inflammation all over his arms, back and legs. He was asked to **stop** application of **#1** and consult a skin specialist. After examination patient was informed that he actually suffered from lichen planus, not psoriasis. His skin had become reactive due to contact with certain plants/plant products. He was told to apply a steroid cream till the reactivity subsided. Patient did not want to use steroid cream and came back to the practitioner. On 10 January 2016 his treatment was changed to:

For lichen planus:

#3. CC21.1 Skin tonic + CC21.2 Skin infections + CC21.3 Skin allergies + CC21.6 Eczema, two drops of each CC in 200gm jar of unperfumed moisturising cream... **TDS**, to be applied on skin lesions

#4. CC12.1 Adult tonic + CC15.1 Mental & Emotional tonic + #3...QDS

After a week the itching stopped completely. There was 60% improvement - the redness had completely disappeared and the existing lesions appeared to be healing. They sometimes flared up again when the patient had a stressful day or stayed up at night watching TV. Patient was advised to develop regular habits and go to bed early. After a couple of weeks all the lesions on the hands had healed completely. The large lesions on the back and legs had almost healed except for a few tiny open sores where the patient had scratched with his nails. Patient was advised to desist from scratching. After six weeks on 7 March 2016 patient reported 100% healing. There were no new lesions and all the old ones had dried up. The flaking of his scalp had stopped completely to the patient's delight, there was no 'white dust' dropping constantly on his shoulders. Patient was asked to continue **#4** for two months and then reduce dosage to **TDS**. He was also advised to continue with the application of the moisturiser.

+++++
10. Bedwetting ^{11422...India}

Mother of an 11-year-old girl came on 11 August 2014 with a complaint of chronic bedwetting by her child right from an early age. The frequency increased from the age of 10 to daily episodes of bedwetting. The child expressed that she had some kind of fear gripping her at night during sleep. The parents did nothing to consult any doctor and no treatment of any kind was given to her.

The practitioner prepared:

#1. CC10.1 Emergencies + CC12.2 Child tonic + CC13.3 Incontinence + CC15.2 Psychiatric disorders...TDS

After 3 weeks the mother reported that the frequency of bed wetting had reduced to alternate night. The intensity of fear was also reduced by 50%. An additional remedy was given with advice to continue **#1**:

#2. NM21 KBS...TDS

After one week the mother said that there was no episode of bedwetting from the very night the first dose of **#2** was given. The intensity of fear was reduced by 75%. Both **#1** and **#2** were continued **TDS** for 3 months, for the comfort of the mother.

After 4 months in mid-December 2014 the fear was completely gone. So the dosage of **#1** and **#2** was reduced to **OD** for a month and then to **OW** for another month.

In February 2016, the mother confirmed that there had been no recurrence of bedwetting by her daughter and no feeling of fear at night.

Practitioner Profiles

Practitioner ^{10728...India} from Mangalore in Karnataka has been an ardent Sai devotee for most of her life. She enthusiastically joins in all seva activities at her local Sai Centre. Once a Bal Vikas student herself, and knowing the value of the program, she became a Bal Vikas teacher and in 2004, she completed her Diploma in Sathya Sai Educare in Mumbai. In addition to training teachers, she teaches children in rural schools around Mangalore and also over 45 orphans in a kindergarten. She feels any form of seva nurtures the soul.

She first heard of Sai Vibrionics from the information leaflet and application form sent to her Sai Centre. Because of her keen interest in seva she was the natural choice of her Samiti to be trained as a vibrionics practitioner; she completed this training in 2009. Soon she started a clinic every Thursday at her Sai centre in Mangalore where she has treated 6,500 people, most of them with great success. She treats urgent cases at all hours.

She finds the work to be very rewarding, confident that Swami works through her to ease her patients' suffering. She considers herself privileged to be His instrument, always remembering that it is Swami, and not she, who is the Healer. She sees her patients at the Sai centre where she feels the healing vibrations are exceptionally strong because Swami Himself visited the centre twice, where He spent time on both occasions sitting in His chair.

In her seven years of practice, she has followed the way she was initially trained, her most important lesson being: 'nothing is impossible with our Swami'. Overwhelmed and humbled by the constant stream of gratitude from her patients, her attitude is that when you trust God completely, miracles happen. She has also worked with other practitioners in medical camps, both at the Brindavan campus and in villages around Mangalore. A wide range of cases such as various cancers, psychiatric and neurological disorders, infertility, skin problems, arthritis and ailments afflicting both animals and plants, all find help with her good use of the 108 combos in her box.

Seven years of Vibrionics practice has inspired her to yearn for more and more of Swami's work. She says her rewards are huge, namely peace of mind and deep satisfaction, so she prioritises her seva work, considering it God's work. With this in mind, she has always encouraged her husband and children to be self-reliant, allowing her time for seva. According to her son, 'Mummy has been chosen by God to do His work; she must be free to do it'.

Cases to share

- [Leukaemia](#)
- [Menorrhagia, uterine fibroids](#)
- [Infertility](#)

+++++

Practitioner ^{01180...Bosnia} has been practicing Vibrionics for the past 17 years and is highly experienced in treating the most complex chronic health problems as well as everyday common symptoms. Additionally, the practitioner is proficient in homoeopathy. He is an instructor of advanced homoeopathy to mostly young homoeopathic practitioners. This has given him wide exposure to hands-on experience in both diagnostics and treatment.

His first encounter with vibrionics was in 1999, when he attended a workshop conducted by Dr J Aggarwal and his wife in the practitioner's home town. Instantly, he felt a deep connection with vibrionics. Since then, he considers practicing vibrionics to be his religion, his passion and his life – a role-model attitude towards seva. He dedicated several years to daily study, thus assimilating and accumulating as much knowledge as he could about vibrionics and homoeopathy. He has been treating patients exclusively with vibrionics remedies. Even after many years of in-depth study, he feels as though he does not have a good grasp of all the remedies out there. However, he feels immense satisfaction as he continues to receive a large volume of patients whom he serves in the spirit of complete surrender to Divinity. On the intellectual

front, he believes that Swami gave him the required confidence by giving him the opportunity to serve as a teacher.

The practitioner attributes his success in vibrionics to two core guiding principles – forgiveness and prayer for Divine protection. He believes, practicing forgiveness in his own life and teaching the patients to do the same, has helped immensely in developing a strong connection with Divinity – almost as if it were a hotline with Divinity. The whole ritual happens in the heart of an individual. In this technique, you establish a silent, mental communication towards all - each person, institution, animal, and each incidence which caused ungodly feelings in you. You ask each person for forgiveness and you forgive them inside your heart, detaching yourself from them at the same time. You let them be free and you ask them to set you free.

When patients start to practice this ritual of forgiveness, he can see their auras change. Their experiences are amazing. Several patients have confirmed that once they practiced forgiveness their wishes manifested instantly into tangible positive experiences; impossible situations seem to get solved easily. Some patients have remarked, “I’m not the same person I was before; now I’m what I always wanted to be”. This puts them on their road to recovery.

For practitioners, he recommends that prior to starting a seva session, they should make a silent prayer to the Divine to cover them in Divine light or visualize in meditation, eg., being inside a golden cylinder as in Phyllis Krystal’s method. This ensures that they are guarded against any negative vibration they may be susceptible to, while treating patients who come with various health and other problems.

The practitioner has been deeply spiritual since his early youth, with a heightened sense of self-awareness. He believes that having undergone several health problems at a very young age, including loss of movement in his right hand and foot, and experiencing other personal losses in life such as, collapse of his business, has brought him very close to God. In fact, he has had several personal encounters with Swami including a personal interview. In an extended padnamaskar that lasted a few minutes, he had the incredible experience of being one with the universe. Swami’s constant presence in his life has served as a huge encouragement for him to work tirelessly in delivering seva through vibrionics.

The practitioner has served over four thousand patients and treated with great success multitude of problems including ailments of the heart and blood vessels; liver diseases such as pain and swelling and fatty liver; male and female genital problems including infertility, inflammation of cervix, pelvis and ovaries; headaches and migraines, high and low blood pressure; behavioural difficulty in children, stress and lack of concentration and learning difficulty in students; inflammation and stones in kidney; food and cigarette addictions; loss of memory and lack of blood flow to brain; bone disorders, osteoporosis, sciatica, arthritis, knee and hip joint problems (replacements avoided); skin disorders - eczema, ulcers, warts, herpes, enlarged glands.

He also provides much-needed support to several post-surgery trauma patients. What is amazing to note is that the practitioner has had successful treatment outcomes in several cases where the patient and the medical doctor had given up all hope after extended periods of allopathic treatment. His success in bringing about incredible cures can be attributed to two main factors, the first is his intuition and the second is his sound knowledge of homoeopathy. He also uses with equal effectiveness 108 common combos.

Here are a few special combos for some diseases, he has prepared by combining selected 108CCs; these are supported by a brief narration of some extraordinary cures he has achieved:

1. Lung Cancer. CC2.1 Cancers – all + CC2.2 Cancer pain + CC3.2 Bleeding disorders + CC9.2 Infections acute + CC10.1 Emergencies + CC15.1 Mental & Emotional tonic + CC15.2 Psychiatric disorders + CC15.3 Addictions + CC17.2 Cleansing + CC19.1 Chest tonic + CC20.1 SMJ tonic + CC21.1 Skin tonic...6TD

A patient had undergone surgery for lung cancer but the cancer came back. After four months of above therapy the lung cancer disappeared and the man stopped smoking. He feels great even years later.

2. Prostate Cancer: #1. CC2.1 Cancers – all + CC2.2 Cancer pain + CC3.1 Heart tonic + CC3.2 Bleeding disorders + CC4.2 Liver & Gallbladder tonic + CC6.3 Diabetes + CC9.2 Infections acute + CC9.3 Tropical diseases + CC9.4 Children's diseases + CC10.1 Emergencies + CC13.2 Kidney & Bladder infections + CC14.1 Male tonic + CC14.2 Prostate + CC14.3 Male infertility + CC15.2 Psychiatric disorders + CC15.3 Addictions + CC15.6 Sleep disorders + CC17.2 Cleansing + CC18.3 Epilepsy + CC19.7 Throat chronic + CC20.4 Muscles & Supportive tissue + CC21.2 Skin infections + CC21.7 Fungus...6TD for 1 year (3 years for males over 60 years of age) followed by #2. CC14.1 Male tonic...TDS for 2 years.

3. Heart ailments: CC3.1 Heart tonic + CC3.2 Bleeding disorders + CC3.4 Heart Emergencies + CC3.6 Pulse irregular + CC6.3 Diabetes + CC9.2 Infections acute + CC10.1 Emergencies + CC12.1 Adult tonic + CC15.2 Psychiatric disorders + CC15.3 Addictions + CC18.3 Epilepsy + CC19.1 Chest tonic + CC20.4 Muscles & Supportive tissue + CC21.2 Skin infections...6TD along with the prescribed allopathic medicines.

On improvement, the allopathic tablets should be reduced slowly by replacing one dose of the allopathic medicine with one dose of **SR543 Agaricus Mus 200C** until the former is completely stopped. When the medical tests confirm good heart condition, the combo should be reduced to TDS. On a second test confirming good heart condition the patient should take CC3.1 Heart tonic...OD as maintenance dose.

4. Gallstones: CC4.2 Liver & Gallbladder tonic + CC4.7 Gallstones...6TD for 2 months

He has had success even with patients older than 80 years.

5. Thyroid nodules: #1. CC2.3 Tumours & Growths + CC3.2 Bleeding disorders + CC4.2 Liver & Gallbladder tonic + CC6.1 Hyperthyroid (or CC6.2 Hypothyroid) + CC6.3 Diabetes + CC9.2 Infections acute + CC13.1 Kidney & Bladder tonic + CC15.2 Psychiatric disorders + CC15.3 Addictions + CC19.1 Chest tonic + CC19.7 Throat chronic + CC20.4 Muscles & Supportive tissue + CC21.2 Skin infections + CC21.8 Herpes...6TD. #2. SR268 Anacardium 30C...TDS

After confirmation from the doctor that nodules have disappeared, the therapy should be continued for another month...TDS. If the patient is taking allopathic medicine, this should be reduced slowly by replacing one dose of the allopathic medicine with one dose of SR543 Agaricus Mus 200C until the former is completely stopped.

The practitioner treated patients who used hormonal therapy for more than 10 years for thyroid nodules which were growing bigger. After using the above combo, the nodules completely disappeared and patients stopped allopathic treatment altogether even though they were originally told that they would need to take the hormones for their entire life.

6. Flu, cold, fever, inflammation: CC9.2 Infections acute + CC9.3 Tropical diseases + CC9.4 Children's diseases...frequent (every 10 or 15 min).

On improvement, reduce slowly to 6TD and to TDS on further improvement and eventually to OD, this to continue over a period of 15 days in total. For high fever, the frequent dosage is every 5 or 10 min until the temperature comes down. In his practice, he had only one case of a child where it took 3 hours for the fever to come down; usually much less in other cases. With the above combination, he had very good results while treating animals - cats and dog where doctors gave no hope, were completely cured.

7. Mouth blisters: CC11.5 Mouth infections + CC15.2 Psychiatric disorders + CC21.1 Skin tonic + CC21.11 Wound & Abrasions...6TD

One patient used to get blisters inside and outside her mouth every spring and autumn. After using the above combo the blisters disappeared in just one week. To prevent the bacterial or viral infection from recurring the remedy was continued for a further 2 weeks at TDS.

8. Nervousness, depression, anxiety:

CC3.1 Heart tonic + CC4.2 Liver & Gallbladder tonic + CC6.3 Diabetes + CC12.1 Adult tonic + CC13.1 Kidney & Bladder tonic + CC15.2 Psychiatric disorders + CC15.3 Addictions + CC15.5 ADD & Autism + CC17.2 Cleansing + CC18.2 Alzheimer's disease + CC19.2 Respiratory allergies + CC20.1 SMJ tonic...6TD together with prescribed dosage of allopathic medicine.

When the patient has stabilized, start replacing one dose of the allopathic medicine with one dose of **SR543 Agaricus Mus 200C**. This should be done slowly over a period of at least 15 days. The practitioner had well over 50 cases of complete healing (mostly aged between 17 to 65) which took between one week to 6 months and none of the patients use any kind of medicine anymore. According to the practitioner, serving with vibrionics requires three main qualities: Intense desire to serve, nobility and

knowledge. "Missing one of these three elements will not make your heart spread love, the main source of all healing."

☯ The Answer Corner ☯

1. Question: *It is observed that in some instances a chronic disease that has been completely cured resurfaces after sometime. Why?*

Answer: This is an important question in terms of understanding how a disease could provide us with an opportunity to build awareness around restoring our true way of life. A disease is a sign which demands that we pay attention to the pain or dis-ease caused by the disease. It could play the role of a key indicator for changing or transforming our lifestyle that includes our attitude, vices, eating habits, food intake through five senses, exercise, way of thinking, etc.

Treating the patient with only vibrational remedies is not a long-term/sustainable solution. Vibrionics being a form of holistic healing, it is prudent for the practitioner to counsel and work with the patient at all levels - body, mind, and the spirit – with a view to addressing the root cause of the problem. A conscious effort on the part of the patient to adapt to a much desired lifestyle is required to bring about a permanent cure. It is from this perspective that practitioners can be role models to transform lifestyles and daily habits. We should look upon the disease as God's grace to warn us of the need to transform.

+++++

2. Question: *Why don't the remedies that we prepare for ourselves as practitioners always work?*

Answer: There are several reasons why some practitioners find that remedies do not work as well on themselves as they do when given to their patients for the same ailment. Some of these are as follows:

- The practitioner maybe more attached to the outcome due to his anxiety to get well soon and so he may not be acting in a true spirit of surrender.
- While counselling the patient, a practitioner objectively takes down all the relevant information before prescribing a remedy. Whereas when treating himself, he may not be making comprehensive notes about his problem and may not get to the root cause.
- The patient looks upon the practitioner as his doctor and therefore tends to follow his instructions faithfully. A practitioner may not follow the prescribed dosage or may not fully comply with the precautions for taking the remedy.
- The key to true healing lies in answer to Q1 above.

+++++

3. Question: *Can we give remedy to a patient who does not have faith in Vibrionics?*

Answer: If a patient does not have faith in vibrionics but chooses to come to you and asks for vibro remedy, we should always give him the remedy with *love*. You should, however, never persuade or force a patient, thus letting the patient use his free will, which is very important. So long as the patient has trust and confidence in you as a practitioner, there can be no barrier between the patient and your remedy.

+++++

4. Question: *I have experienced that remedies are more effective in water. But I find that the existing patients are resistant to this change as they find pills easier to take. What should we do?*

Answer: There is no doubt that it is easier to start new patients to take their remedies in water (this should be done in every case) than to retrain a current patient using pills to switch to water. We can make existing patients aware of the greater effectiveness of the remedies taken in water. Putting pressure on an existing patient who prefer not to switch to water-based remedies can be counterproductive as any resistance by the patient will carry negative energy.

+++++

5. Question: *Can the cleansing remedy be taken every 10 minutes for a period of 2 hours on a daily basis?*

Answer: No, because a cleansing remedy can cause severe pullout. So it is best to take it as prescribed, generally TDS.

+++++

6. Question: *Can the SRHVP ever produce negative vibrations?*

Answer: No, the SRHVP can never produce negative vibrations whereas other similar devices can. Swami confirmed in an interview that the SRHVP can make only Divine Vibrations!

+++++
7. Question: *Should we ever lock the dial of the SRHVP?*

Answer: Never lock the dial. It is not necessary, even while traveling.

+++++
8. Question: *Can we cover the SRHVP machine with a cloth or plastic sheet while continuously broadcasting healing vibrations to a seriously ill patient?*

Answer: Yes, you can as this will protect the machine from accumulation of dust in the wells.

+++++
9. Question: *Is it possible that you could unknowingly take on your patient's problem?*

Answer: Yes it is indeed possible, and some practitioners have reported so. The sense of non-doership is most essential in treating a patient. You as an individual are not the doer of treating the patients. It is best to pray to the Divine or your Inner True Self that you wish to serve the patients with love. In this state of prayerful surrender, it should hardly occur to you to take on to yourself the patient's symptoms; hence, you are fully protected.

☪ Divine Words from the Master Healer ☪

"In order to evolve oneself into a balanced individual, service is an essential quality. This ideal of service has the good quality of removing ego in man. It promotes love and affection. It takes him away from the aspect of worldly attachments and puts him on the path to the divine. This idea of service also explains to him the meaning of divinity. It can give widespread pleasure and bliss for the entire mankind. In fact, service is the first step along the spiritual path."

+++++
"How to lead a healthy life? Let Me tell you about My own health. I am sixty eight years old, and believe it or not, My weight since my 14th year of age has been constant at 108 pounds only. It never went up to 109 pounds not came down to 107. You can lead a healthy life once you achieve this kind of balance and moderation. I never eat even a little bit excess. I observe the principle of moderation whether I am invited for food by a millionaire or a pauper. Even though I am sixty eight years, My body is in perfect trim! I do not suffer from aches and My heart is as sound as a rock. There is none who can work like Me and exert himself as much as I do! The secret of My sound health is My regulated food habits. This is how one has to achieve the unity and harmony of food, head and God."

Forthcoming Workshops

- ❖ **Italy Padua, Venice:** Refresher Seminar 21 May 2016, contact Manolis at monthlyreports@it.vibrionics.org
- ❖ **France Dordogne:** Refresher Seminar & AVP workshop 18-19 June 2016, contact Danielle at trainer1@fr.vibrionics.org
- ❖ **India Kasaragod, Kerala:** AVP Workshop 2-3 July 2016, contact Rajesh at sairam.rajesh99@gmail.com
- ❖ **India Puttaparthi:** AVP Workshop 14-18 July 2016, contact Hem at 99sairam@vibrionics.org
- ❖ **USA Shepherdstown, WV:** AVP workshop 15-17 July 2016, contact Susan at trainer1@usa.vibrionics.org

In Addition

Swami continues to shower His blessings...

Practitioner ¹²⁰⁵¹ had successfully treated a breast cancer patient in Bangalore, so many devotees asked for vibrionics medicines. On Thursday 15 October 2015, she went to this devotee's house to give them treatment. She kept her 108CC box at their altar. Within a few minutes, she was abundantly blessed with an outpour of vibhuti on her box as well as her wellness kit (see separate pic).

Practitioner ⁰²⁷⁸⁷, after getting up from his meditation in the morning of 4 Jan 2016 was pleasantly surprised to see that vibhuti had materialised on his 108CC box (pic on the next page).

US & Canada Coordinator ⁰¹³³⁹ went to her local Sai Centre on Sunday 10 Jan 2016 for a meeting. Afterwards she had planned to recharge the 108CC box for a visiting SVP. She placed the Master box at the altar. At the conclusion of the meeting, when she picked up the Master box, she was delighted to find a sprinkling of vibhuti on top of her box (pic below).

With Sai love and blessings

Om Sai Ram!

Sai Vibrionics. . . towards excellence in affordable medicare - free to patients
